

I-Doser Labs is the leading producer of Binaural Brainwave CDs, MP3s, and computer-based Binaural Brainwave Doses. Using proven, scientific, and safe methods of synchronizing your brainwaves; a simulated state can be achieved through the use of our advanced audio CDs, MP3s, or the I-Doser Player Application for Personal Computers. Our Binaural process has been refined with years of research and development. With thousands of satisfied users, the I-Doser Labs CDs, MP3s, and Computer-Based Applications continue to lead the industry as the only safe and effective method to achieve a simulated mood or experience.

Brainwave synchronization (entrainment) may be achieved when audio signals are introduced to the brain causing a response directly related to the frequency of the signal introduced, called binaural beats. Two tones close in frequency generate a beat frequency at the difference of the frequencies, which is generally subsonic. For example, a 500 Hz tone and 510 Hz tone will produce a subsonic 10 Hz tone, roughly in the middle of the alpha range. The resulting subsonic tone may affect the state of mind of the subject. The "carrier frequency" (i.e. the 500 Hz in the example above), is also said by some to affect the quality of the transformative experience.

The BESTSELLING Recreational Drug Simulation CDs:

Recreational Simulations are collections of Dose Simulation tracks. Each audio track contains our advanced binaural beats that will synchronize your brainwaves to the same state as the recreational dose. Mixed with our advanced auditory pulses are soothing backtracks of ambient soundscapes to help the brain induce of state of mood lift, euphoria, sedation, and hallucination. Also try our MP3s packs!

The MOST ADVANCED Binaural Computer Application:

I-Doser for the PC is the most advanced computer application available to achieve a simulated mood or experience through the use of binaural beats. Use I-Doser to play doses purchased through the I-Doser Store. Each Dose is scientifically designed to give you the optimal measure of beats Safely and Effectively to induce state.
